Vidhan Sharma

Product Associate | Enterprise SaaS & Order Management

Email: vidhan9848@gmail.com | GitHub: github.com/Vidhansha31 | LinkedIn: linkedin.com/in/vidhansha31

PROFESSIONAL SUMMARY

Product Associate working on enterprise SaaS products across Order Management, omnichannel commerce, and system integrations. Experienced in turning business requirements into clear product workflows, functional documentation, and testable changes, collaborating with QA, Dev, and client teams through testing and release.

CORE COMPETENCIES

Order Management Systems (OMS), Inventory Availability (ATP/QOH), Order Routing & Fulfillment, Shopify, Enterprise Integrations (NetSuite, SAP, POS, Shipping), SQL / PLSQL, API Testing (JSON payloads, Postman), Functional Specifications, User Stories, Statement of Work (SOW), Root Cause Analysis (RCA), UAT Coordination.

EXPERIENCE

HotWax Commerce - Product Associate

- Translated enterprise client requirements into functional product changes across OMS workflows.
- Contributed to 100+ functional specifications, user stories, and Statements of Work.
- Supported 90+ planned, scheduled, emergency, and production release activities.
- Investigated production issues across transactional data, APIs, and logs supporting Root Cause Analysis.
- Coordinated closely with Development and QA teams to validate fixes and verify production behavior.

FEATURED PROJECTS

Vitaran Distribution Management System (Product Owner)

- Designed distribution system replacing spreadsheets for customer pricing, inventory, and delivery tracking.
- Mapped separate administrator and delivery worker mobile workflows with WhatsApp invoice automation.

Production Troubleshooting & System Integrations

- Investigated production issues using SQL/PLSQL, JSON payloads, and logs across connected systems.
- Supported fix verification across Shopify, HotWax, NetSuite, and shipping/POS integrations.
